**TYPICAL APPLICATION OF TELEMATICS
FUNCTIONS SPECIALLY DEVELOPED FOR REMOTE
SUPERVISION OF REFRIGERATED ASSETS.
INCLUDING DATA LOGGING AND
GEOLOCALIZATION.**

We have the means, the know-how and the expertise to offer you a comprehensive solution, because we manage the whole chain, from the HW design to the SW development.

Thanks to our significant experience built on different application fields, we have been able to make the most of our expertise on remote diagnostics. Our technologies opened the doors into the Internet of Things and we can now offer the possibility to work ideally with any type of asset.

A powerful analytics engine to leverage valuable, accurate and profitable information from all your data.
New advanced reports with a fully customizable dashboard.
With the option of creating ad-hoc reports and set up the graphical representation.

Through our solution, you will benefit of a single global SIM offering a worldwide service over 194 countries. This unique solution brings you the great advantage of managing your services over different countries, dealing with a single network carrier.

Moreover, the global SIM has a fixed cost worldwide, regardless of the different network carriers' tariffs.

- 1** SIM
- 1** MULTI-NETWORK
- 1** FLAT COST

ONE SIM ONLY

We offer a single, global SIM to access a worldwide service

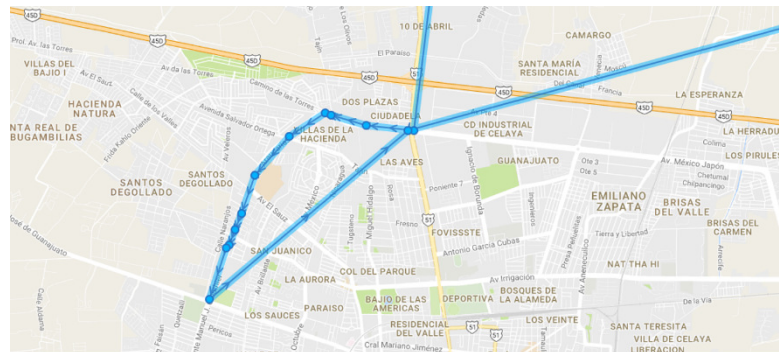

MORE FLEXIBILITY

Customers have full control on the usage of the SIM, with the option of switching it On/Off according to their needs

FLAT COST WORLDWIDE
