INSTRUCTION MANUAL

96/10 - Code: ISTR_M_XF_E_02_--

Ascon Tecnologic Srl

www.ascontecnologic.com

GENERAL INDEX

Thank you for choosing an ASCON controller

The instruments of the XF series belong to the last generation of microprocessor based controller, are universal, very powerful but simple to use.
They are fitted with AUTO-TUNE , an auxiliary for system start-up, and serial communication for introduction into a distributed control network.
They are complete because all possible variables are always present.
Configuration of the instrument permits determination of the operating mode according to the application required.

1.1 Identification of model

Model code	Configuration code	Beginning and end of scale
XF -A B C 0 /		
Power supply	A
100 …240 V 50/60 Hz	3
16 …28 V 50/60 Hz and 20…30 Vdc	5
Serial communications	B
None	0
20mA C.L Std Ascon protocol	1
20mA C.L. Modbus/Jbus protocol	2
RS485 port Modbus/Jbus protocol	3
Retransmission output Y4	C
None	0
Fitted (4...20 mA or 0...10 Vdc)	1

OPTIONS

1.2 Configuration code

Configuration code	Beginning and end of scale
E **F** **G** **H** - **I** **L** **M** **N** /	**O** . . . . **P**

Model code
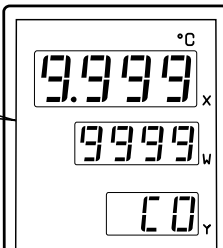

1st part	Input X	**E**
		F
	Main output Y1	**G**
		H

2nd part	Auxiliary output Y2	**I**
	Auxiliary output Y3	**L**
	Retransmission output Y4	**M**
	Set point W	**N**

Beginning and end of scale (for configurable scales only)	**O**
	P

The controller is normally configured in the factory.

⚠ If this appears on starting

the controller **IS NOT CONFIGURED**

In order to configure the controller, follow the configuration procedure reported in the enclosed leaflet

2 • FUNCTION OF KEYS AND DISPLAYS

1 Measurement X
2 Set point W
9 Manual operation
3 Main output % Y1
6 Main output Y1 "ON"
6a Main output Y1 (increases - Heat)
6b Main output Y1F (decreases - cool)
13 Set point
15 Increment digit
14 Select digit
17 Confirm data
18 Automatic / Manual
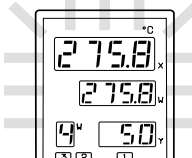

NUMERIC INDICATORS X, W, Y, N°

|	
1 - Measure X (green)	The value of measure X is expressed in engineering units. If above end of scale. If below beginning of scale - In programmation: displays parameter values - In configuration: displays the values of the 1st part of the configuration code (see enclosed leaflet)
2 - Set point W (green)	Displays the operating Set point value (Local or Remote) - In programmation: displays the parameter codes - In configuration: displays the index values of the 2nd part of the configuration code (see enclosed leaflet)
3 - Output Y1 (green)	Displays the value of main output Y1 from 0...100% (from - 100 to 100% for Y1 with dual action) - In configuration: Displays the mnemonic code Co
4 - Auxiliary N° (green)	Normally off, lights up to display the selected N° of 1 of the 4 stored Set points , in which case led 5 "W" lights up too

2 • FUNCTION OF KEYS AND DISPLAYS

LEDS FOR OUTPUT STATE

6 - Output Y1 (red) [1]	Light with output Y1 "ON" De-activated with continuous or dual action discontinuous output

6a - Output Y1 (red) [▲]	Light with output	Y1 "ON" (increasing servomotor position)
		Y1 (heat) "ON" - dual action
6b - Output Y1F (red) [▼]	Light with output	Y1 "ON" (decreasing servomotor position)
		Y1 (cool) "ON" - dual action

7 - Output Y2 (red) [2]	Light with output Y2 "ON"
8 - Output Y3 (red) [3]	Light with output Y3 "ON"

LEDS FOR OPERATING STATE

9 - Manual (green) MAN	Light in Manual operation
10 - Remote (green) REM	Light when the Remote Set point is operating (if off, the operating Set point is the Local one)
11 - Auto-Tune (green) AT	Light when Auto-Tune is AT in course
12 - Serial comm. (green) SCI	Permanently light when the serial communication is enabled to write. Flashes with signal in transit
Loop - Break - Alarm	With output Y3 active and configured as Loop Break Alarm, the front displays X and W are flashing (see p. 15)

4

KEYS		

13 - Set Point ⎐ W	configuration:
	1 Local used for:
	      • modifying the Local Set point
	
	1 Local + 1 Remote used for:
	      • modifying the Local Set point
	      • passing from Local to Remote Set point
	       and viceversa (see enclosed leaflet)
	
	1 Local + 4 storable used for:
	      • modifying the Local Set point
	      • to recall the Local operating Set point
	      • recalling the 4 memorized Set points
	       (see enclosed leaflet)	

14 - Digit selection ◁−	Selects the digit to be modified (see enclosed leaflet) In Manual operation, decrements the value of main output Y1	**Keys for modifying numeric values of any data**
15 - Increment digit △+	Increments the value of the flashing digit, from 0…9 In manual operation increments the value of main output Y1	
16 - Functions F	Permits access to menu of functions to be programmed	**Keys for data programming and processing**
17 - Enter ▷	Enter or Scroll of values and modes of operation	
18 - Auto/Man A/M	Passage from Automatic to Manual operation and viceversa	

3.1 - Overall dimensions (in compliance with DIN 43700)

With fork terminals 6.9 max.	0.25 ÷ 2.5 AWG 22 ÷ 14	1
With tinned wire 6 ÷ 7		2
Preferential		
7
D • Protecting the terminal board

1
Rotate upwards

2
Depress the plate to engage the pin
4 • ELECTRICAL WIRING

Although this controller is designed to resist the heaviest disturbances present in industrial environments (level IV of standard (IEC 801-4), it is advised to keep to the following precautions:

Precautions

⚠️

Single out supply line from power line

Keep away from teleruptors, electromagnetic contactors and powerful motors

Keep away from power groups, in particular if with phase control

Serial communication $\boxed{A}$

Analogic inputs $\boxed{B}$

Logic inputs and analogic signals $\boxed{C}$

Input $\boxed{D}$

Outputs $\boxed{E}$

Advised conductor course

Power supply and output channels

Channel for low level signal conductors

4 • ELECTRICAL WIRING

1 • Single power supply

Single power supply
"Switching" type
• Standard: 100 to 240 Vac - 15% + 10%
            250 Vac max.
• for low tension: 24 Vac -15% + 10%
            24 Vdc ±15%
Absorbed power 4VA
2 • "X" measurement input

A - For thermocouples J-L-K-S-R

Line: max. 150 Ω

• Respect polarities

• For eventual extensions, use a
  compensated cable suitable for the type
  of thermocouple used

• The eventual screen is well earthed
  at only one end

B - For RTD Pt100

for 3-wire connection only
Line: 20 Ω max. for wire

• For 3-wire connection, use cables of same
  section (min. 1 sq.mm)

• For 2-wire connection, use cables of
  adequate section (min. 1.5 sq.mm.)

Note:
with a 15 m. probe-controller distance and
a 1.5 sq.mm. section cable, the error is
about 1°C.

C • Continuous, mA, Volt

Auxiliary supply for transmitter

Input mA, Volt

See calibration procedure on the enclosed sheet

6 • Main output Y1
Universal and galvanically isolated. 2 relays are simultaneously present for discontinuous output with single or dual action (HEAT:COOL), or for the floating output with 3 positions for servomotors and the signal for standard continuous output 4..20mA (or 0..10Vdc) which can also be Logic output 0/18Vdc).

Relay
Relay 2nd channel (cool)

Continuous 4..20mA (0..10Vdc)
Logic output 0/18Vdc
A • Single with Relay
Load

NA contact, capacity 5A/250Vac for resistive loads (transition 2 x 10 (coeff.5) min. at 5A/250Vac)

B • single in current

	Active high (above)	Set point (1): from beginning to end of scale
	Active low (under)	

(1) - The Set point of Y2 and Y3 is not limited by the limits of the main Set point W1, but only by the scale span.

Deviation with startup inhibition		
	Active high (above)	Set point ΔW (1) -300...+300 steps compared to W1
	Active low (under)	

"Loop-Break-Alarm" LBA (control loop defect/interruption)

Any interruption in the connections or any anomaly in the operation of one of the control loop components, will cause the output Y3 to be energized after a few minutes and front display X and W will be flashing.
The alarm state will stop when the anomaly causing it stops or

depressing any key for silencing it.
⚠ **With ON - OFF action "LBA" feature is not available**

In order to prevent tampering or inadvertent alterations of the configuration or of some important parameters at the programming stage, 2 passwords have to be entered.

Set point	1 Local + 4 storable		
	Distinct ascent and descent gradient slope	0.1…100.0 digit/min.	
	Higher and lower limit	from beginning to end of scale	
Local/Remote **Set point**	In current	4..20mA, Ri30Ω	Not isolated accuracy: 0.1% at 25°C.
	In voltage	0..10Vdc, Ri 330kΩ	
Control mode	Algorithm	On - Off, PID, FUZZY, PID with I and D excludable actions.	
	Proportional band (P)	0,5..999.9%	
	Integral action time (I)	0.1..100min., excludable	
	Derivative action time (D)	0.01..10min., excludable	
	Cycle time	1..200 sec. (for discontinuous control)	
	Hysteresis	0.1..10% (for on-off control)	
	Dead zone	± 0…5,0% for dual action (heat-cool)	
Auto - Tune	For automatic parameter adjustment (One shot)		
Auto/Man Station	With bumpless action, AUTO/MAN transfer via keyboard, logic input and serial communication.		

Main output Y1 (configurable)	Single or dual, with direct or reverse action			
	Discontinuous	Relay with dual action 2 contacts NA, 5A/250Vac, 2x10 coeff.5 transitions		galvanically isolated
		Logic	0.18 Vdc, 20mA max. (for static relays)	
	Continuous	Current	4..20mA(450Ω max.,10 Volts max.)	
		Voltage	0..10Vdc(450Ω min. 20 mA max.)	
	Maximum output	10..100% (1st channel △) -10..-100% (2nd channel ▽)		
Auxiliary outputs Y2 - Y3 (configurable)	Relay	2 contacts NA, 5A/250Vac, 2x10(coeff.5) transitions		
	Action mode	active high (above the set point) active low (below the set point)		
	Hysteresis	0,1..10%		
	Type of Set point	deviation	± 300 steps (with or without inhibited startup)	
		band	0..300 steps	
		independent	from beginning to end of scale	
	Special functions	Loop-Break-Alarm (signal of control loop defect)		
Retransmission output Y4 (option)	Current	4..20mA(450Ω max.,10Vdc max.)		galvanically isolated
	Voltage	0..10Vdc(500Ω min.,20mA max.)		
Serial commnication (option)	Interface 20mA C.L. passive and galvanically isolated (see manual MIU-CS/E) or RS485 port			
Protections	Access to parameters	On three levels for: modification, indication only, no access		
	Immunity to disturbances	level IV, standard IEC 801-4		
	All significant data are stored in a non-volatile memory			
Single power supply	Standard model	100..240V, 48..63Hz, -15% + 10% 250 Vac max		
	Low voltage model	24V, 48..63Hz, -15% + 10% or 24Vdc ± 15%		
	Absorbed power	about 4VA		
Auxiliary power supply	24Vdc ± 10%, 20mA max.	for 2-wire or 3 or 4-wire transmitter		
General features	Isolation group	C according to VDE 0110		
	Climatic group	KWF according to DIN 40040		
	Ambient temperature	0...50°C., humidity 35...85uR%		
	Protection	Front:IP54 standard (IP65 with Kit AXIP65- 1) Cover: IP30, terminal board IP20		
	Material	Self-extinguishing UL94V1		
	Weight	about 480 g.		
	Dimensions	48 x 96, depth 150mm, according to DIN 43700		

GUARANTEE

The equipment is guaranteed free from manufacturing defects for 1 year after installation, for a maximum of 18 months after delivery.
Faults caused by use other than that described in these operating instructions are excluded from the guarantee.

Ascon Tecnologic S.r.l.
